

**Anoka-Ramsey Community College Transfer Guide**  
**University of Minnesota**  
**College of Continuing and Professional Studies (CCAPS)**

**Health Services Management**

Health care is one of the fastest growing industries in the U.S., and the need for highly qualified people to lead and manage health care facilities and staff continues to increase. The health care industry provides career opportunities for students who want to make a contribution to the health of individuals and communities. Health services managers plan, direct, and coordinate medical and health services.

Health services management careers can be found in many health care settings, including:

- hospitals
- physician's/therapist's/practitioner's offices
- clinics and other medical or mental health facilities
- long-term care facilities
- managed-care facilities
- health insurance companies

The Bachelor of Applied Science in Health Services Management (HSM) program was created by University faculty and top industry professionals provides a well-rounded education with an emphasis on acquiring knowledge you can apply immediately.

University faculty and top industry professionals have partnered to create a program to help you acquire the skills you need to succeed.
